

## Changing the Extension/Flexion stop in the Deluxe Hinged Knee

- Remove the 2 screws from the Hinge cover, slide the cover up and away from the hinge:

- The brace is supplied with a 10° extension stop fitted as standard, once the cover has been removed, you can change this as required.

- Once the desired extension/flexion stop has been placed, replace the hinge cover and insert the screws.
- The screws holding the hinge cover, also hold the stop in place.
- Ensure that both hinges are set to the same extension/flexion
